Norm Fisher

2507A Leeper Drive, Champaign IL 61822   217-689-4286   n2fisher@gmail.com

Summary

A hardworking, efficient and effective web site designer and developer skilled in PHP, SQL and other programming languages. Extensive computer-based training development, user interface design, computer hardware, software, networking and user support experience.

Highlights

PHP	Wordpress
SQL / MySQL	PHP-BB
HTML / CSS	Joomla
Javascript	VBscript
Interface Design and Implementation	Customer Support
Project Management	Website design and implementation
Windows Server	Windows Exchange Server

Accomplishments

- Developed database system using PHP and MySQL for a nationwide election campaign. Included mapping software to track location of 12K voters around the country and contacts our organization had with each.
- Developed Wordpress theme and helped to manage a blog over the past 6 years. Provided technical support as Wordpress had updates over the years.
- Developed assembly-language programming for touch panel system.
- Supported Windows Servers and computers at various companies during my career.
- Developed and improved computer-based training language system, including source, font, lineset editors written in that language.
- Developed database system to track church locations; allowing people to locate churches around the country as they travel or move to a new area.
- Managed departmental budget of $1M and 18 people.
- Developed and improved accounting software to manage apartment buildings in Illinois and Indiana.
- Configured shopping carts using two separate cart systems for an office supply company.

Employment History

Martin One Source, Champaign IL   2013 to July 2014
Website Developer   (Discontinued Service Offering)

Hired by this Printing and Office Supplies Company as part of a new business venture to develop and sell websites to their clients. Unfortunately, the sales to support the new venture did not materialize and the company decided to discontinue the service offering. When not developing new websites, I developed several different websites for the company, and provided hardware, software, networking and other types of IT support for organization.
